

PPE Supplies Available Now & More to Come

FMCSA mask distribution, supply demand survey, CTA supply procurement

FMCSA Distribution of Protective Masks for Truck Drivers

FMCSA is assisting in the distribution of one million protective masks provided by FEMA to the nation's commercial truck drivers.

Dates and times for the distribution of masks will be updated as they are established. More information on other distribution locations and dates can be found on [FMCSA's website](#).

State of California Assisting Industry in Obtaining PPE

Following CTA's discussions with state transportation agencies regarding the need to procure disinfectant supplies and PPE for the trucking industry, the Governor's Office of Business and Economic Development (GO-Biz), offered to coordinate with their manufacturing partners to increase production of these materials. ***Your input in this process is critical to make certain enough supplies are produced and earmarked for the industry.***

Even if you do not have an immediate need for supplies, please fill out [this spreadsheet](#) and return it to Taylor Collison at tcollison@caltrux.org. The details from these spreadsheets will help to inform GO-Biz of the demand for each supply type both in the short-term and for longer-term emergency stockpile planning efforts. Simply replace the example data in the spreadsheet with your company's supply needs. Please indicate any information you want anonymized or any other disclosure concerns.

CTA Supply Procurement

Over the past month, CTA has been connecting trucking companies and drivers in need of supplies with vendors. If you have an immediate need for supplies or equipment, and you or someone from your company have not contacted CTA already regarding procurement, please email tcollison@caltrux.org and we will connect you with a list of vendors who have gloves, masks, hand sanitizer, and other disinfectant supplies and protective equipment in stock.
